**Project  
Harvest**

## End of Market Produce Recovery for Food Banks

**Project Harvest** is striving to increase access to nutritious food in the community. We are connecting local growers, food banks, and volunteers to create produce gleaning opportunities here in Snohomish County.

We recognize that access to fresh produce is particularly hard for those on a limited budget. We also know that it is sometimes not ideal to bring home your produce after a farmers market. We would love to redirect this produce to those who need it! That is where Project Harvest comes in! At the end of the Port of Everett Farmers Market, we will pick up any leftover produce you choose to donate. Your in-kind donations will be distributed the very next day to local food banks. Your donations will help fight food insecurity and increase access to fresh and nutritious food in our community.

**Help us make this process work for you!**

**Please let us know if there is something we can do to make this process easy!**
